Hi Jenny--

## **Ex. 5 - Deliberative**

Looks like the main NMFS folks I need to talk to are out until the end of the week so hope to connect to them then and find out more but I have found out that NMFS did settle with WTC which resulted in restoring injunctive relief riparian buffers (not sure the width at this point). WTC and EPA are still working on settlement agreement. He'd need to go back and check the biops but he's pretty sure they considered impacts to non-fish bearing streams that flow into fish bearing ones...so perhaps not all non-fish bearing streams but a much greater # that just fish-bearing.

Hi Everyone,

For our Monday call, here are a couple of documents. The first is an issues paper in the format that our management asked for. It basically outlines options, but I'd like for us to come up with a recommendation if possible. Or in the very least, we can better vet the issues. The second is just some background info that might be helpful. It has a timeline of CZARA and litigation actions and could be helpful for our talk on Monday.

Thanks, Everyone.
